DETAILED ACTION

Information Disclosure Statement

Regarding the IDS of 8/23/2003, the examiner indicated that the underlying document was not received as it was not previously found in the file wrapper. The file currently does reflect that the 8/23/2003 submission did in fact include the underlying Japanese patent application, so the examiners assertion that the document was not received was in error. Applicant submission of an additional copy is, however, appreciated.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The language "wherein the electrostatic protection element portions comprise a second resistor as a common resistor connected to the conductive materials for connecting the gate electrodes of the thin film transistors to the short ring" is indefinite, as a resistor is a two terminal element, and what it means to be connecting multiple

Art Unit: 2871

different gates to multiple different transistors can't be determined. For examination purposes, it is presumed that somehow this language means that the resistor connects the single transistor to a single line.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 17 is rejected under 35 U.S.C. 102(e) as being anticipated by Ha 6493047.

As best understood in view of the rejection under 112 above, the claimed invention is shown in the cover figure of HA including the transistor 45, showing line CL2 and resistors R1 and R2.

Allowable Subject Matter

Claims 2, and 4-12 allowed.

Response to Arguments

Applicant's arguments filed have been fully considered but they are not persuasive. Applicant argued that the new claims are distinct, but no specific reason was given, and in view of the rejection under 112 above, the interpretation given did not distinguish the claim 17 from the reference.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
